Tyche of Antioch within arch; Θ to left.

3.10.*

D. O. 17.

1.83 gms. 180.

705.01.

REFERENCES AND GENERAL NOTES

3.3. Obverse die-link to Sear (BCV) 128.

3.5. Almost certainly officina **B**. The **Z** of the mint signature **KYZ** is retrograde. The precise rarity of this coin is hard to determine. MIBE lists three coins from officina **A**. The same work lists four coins from officina **B** to which may be added three coins from the so-called "Christov Family Collection" sold by Goldberg in 2010 and three that once belonged to the Peter Lee collection, plus a further specimen recorded by Coin Archive Com. Another specimen of indeterminate officina was sold on EBay in about 2005. There may, of course, be a little duplication within this list. It seems likely that the reverse dies from officina **B** were paired with a single obverse die since all known specimens seem to be die-linked by obverse. Only two coins from officina **A** are illustrated: the MIBE specimen (Belgrade; Prahovo Hoard) and one in the Rafah Hoard (Numismatic Chronicle 1978).

3.8. MIBE 12 notes the mint signature as **ANTIX**. Officina **A** appears to be unpublished, although it was listed electronically by Spink and Son Ltd in autumn 2002.

3.9. MIB 12, var. D. O. and MIBE note **B**CONCOPDI and **ANTIX**; see Sherborn, C. D., Numismatic Circular 1914, p. 635.

3.10. The obverse legend is unusually complete.

¹ Baldwins, October 2005.

² June 2008, Carroll F. Wales collection, Morton and Eden, 11-12 June, ex lot 1164.

³ Marc Breispacher, August 2008; ex Peter Lee collection.
